

Digital Opportunities

Exploring Careers in Computer Programming

TIPS AND TRICKS

This information will help you to brainstorm and identify skills needed for a career in technology.

- 1 Make a quick list: What kinds of skills do you need?
- 2 List three skills and a quick sentence why you think those skills would be helpful:

- 1

- 2

- 3

SENTENCE:

- 3 Next, compare your list to the TechPrep by Facebook site—a resource hub that helps you explore constructive skills and benefits while working in technology careers like computer programming. **LINK:** <https://techprep.org/>

Technology careers exist across industries like sports, fashion and healthcare. Knowing how to build the skills sets doesn't always start with coding—it includes collaboration, communication and more. Visit the resource hub to learn more and read about professionals and their career journeys into technology.
